Subject: 607 Johnson Street Restoration and Addition

Hello,

My wife and I live on the corner of Johnson and Lincoln (702 Johnson Street). We have now been residents of this neighborhood for almost ten years. We are very excited and support this project seeing this as a significant improvement to our area. This address has feel into disrepair over the years to include the house and the landscaping. We are confident that the new owners will make the necessary changes visually and structurally that will add to historic value of Johnson Street. We welcome this project and encourage the Planning Commission to approve this design and additions as presented. Thank you for your consideration.

Best Regards,
Eddie and Donna Merideth
